

Writeup For Wild Card Room

step 1: Download and extract the file.

> here you can see some interesting files are present in it

step 2: First I open a gift.pdf

here I see message from the person who sent me the gift and here I found some interesting text in it which is encrypted most probably base64.

I think I am too smart and
very intelligent, that's why
i killed so many people
and police still can't find
me and I want to challenge
you.

"UFBQNGM/MepfRjA3YD81MD5iUFBQ"

```
(jonathan@Anonymous)-[~/Desktop/gift]  
$ echo "UFBQNGM/MepfRjA3YD81MD5iUFBQ" | base64 -d  
PPP4c?1_F07`?50>bPPP
```

> I found another encrypted message I this it is ROT.

Download CyberChef
Last build: 10 days ago
Options
About / Support

Operations
Recipe
Input

rot
From Base64
Alphabet: A-Za-z0-9+/=
Remove non-alphabet chars
Strict mode
ROT47
Amount: 47

Output
!!!c4n_y0u_f1nd_m3!!!

STEP
BAKE!
Auto Bake

Output character encoding: Raw Bytes (detected)

> I decode it From Base64 -> ROT47
 > and i get another message i think it is a kind of password. Let's see it works or not.
 > used this password to open flag.txt file and it works but. There is not flag in there I got another challenge with another encrypted text.

>Let's Decode it : Y2FuX3kwdV9iM2E3X20z

```

(jonathan@Anonymous) - [~/Desktop/gift/cards]
$ echo Y2FuX3kwdV9iM2E3X20z | base64 -d
can_y0u_b3a7_m3

(jonathan@Anonymous) - [~/Desktop/gift/cards]
$
  
```

```

(jonathan@Anonymous)-[~/Desktop/gift]
$ gpg -o flag.txt -d flag.txt.gpg
gpg: AES256.CFB encrypted data
gpg: encrypted with 1 passphrase

(jonathan@Anonymous)-[~/Desktop/gift]
$ ls
cards  flag.txt  flag.txt.gpg  gift.pdf  rooms

(jonathan@Anonymous)-[~/Desktop/gift]
$ cat flag.txt
THM{y0u_ar3_v3ry_1nt3ll1g3nt!!!}
really detective I told you before find me not a flag.

I am bore, lets play card game:-
I have Trail (Three of a Kind)
1. King of Spades
2. King of Hearts
3. King of Diamonds

"Y2FuX3kwdV9iM2E3X20z"

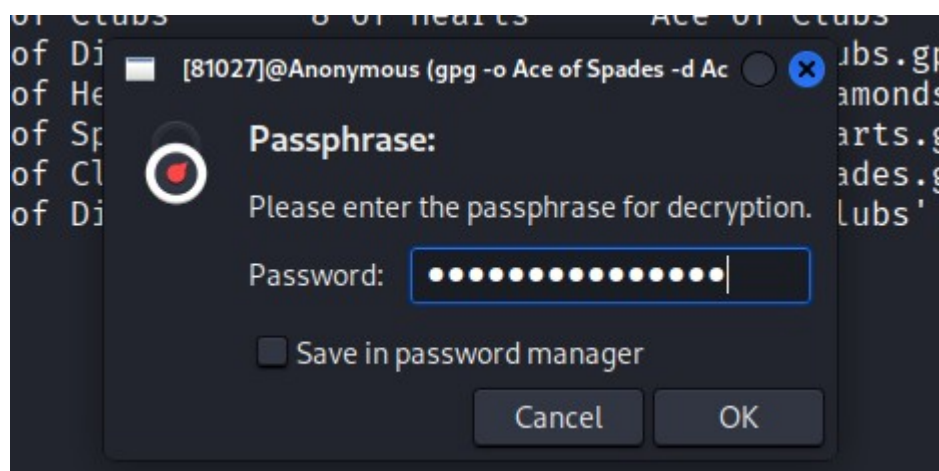

(jonathan@Anonymous)-[~/Desktop/gift]
$

```

> Criminal wants to play game with me that interesting according to the game i need to file the powerfull card combination which can beat the three kings that is three ace i think...

> let's see, I navigate to the card directory and here I found so many files and the interesting thing is that only Ace cards are protected.

> I use the previous message to open this file.

> You can enter the passphrase here.

> After so many struggle I see that here is also a joker card present in it and when i open joker file i found the to decrypt the message.

```

(jonathan@Anonymous)-[~/Desktop/gift/cards]
$ cat 'Ace of Diamonds' 'Ace of Hearts' 'Ace of Clubs' 'Ace of Spades'
kwbF_5_
SSBkb250IGxvdmUgeW91
GbnEcpDkvLLunkxJzcCsa
m_esqto_lhc_xgsh_mqteer_zvzle!!!

(jonathan@Anonymous)-[~/Desktop/gift/cards]
$ cat 'Ace of Diamonds' 'Ace of Clubs' 'Ace of Spades' 'Ace of Hearts'
kwbF_5_
GbnEcpDkvLLunkxJzcCsa
m_esqto_lhc_xgsh_mqteer_zvzle!!!
SSBkb250IGxvdmUgeW91

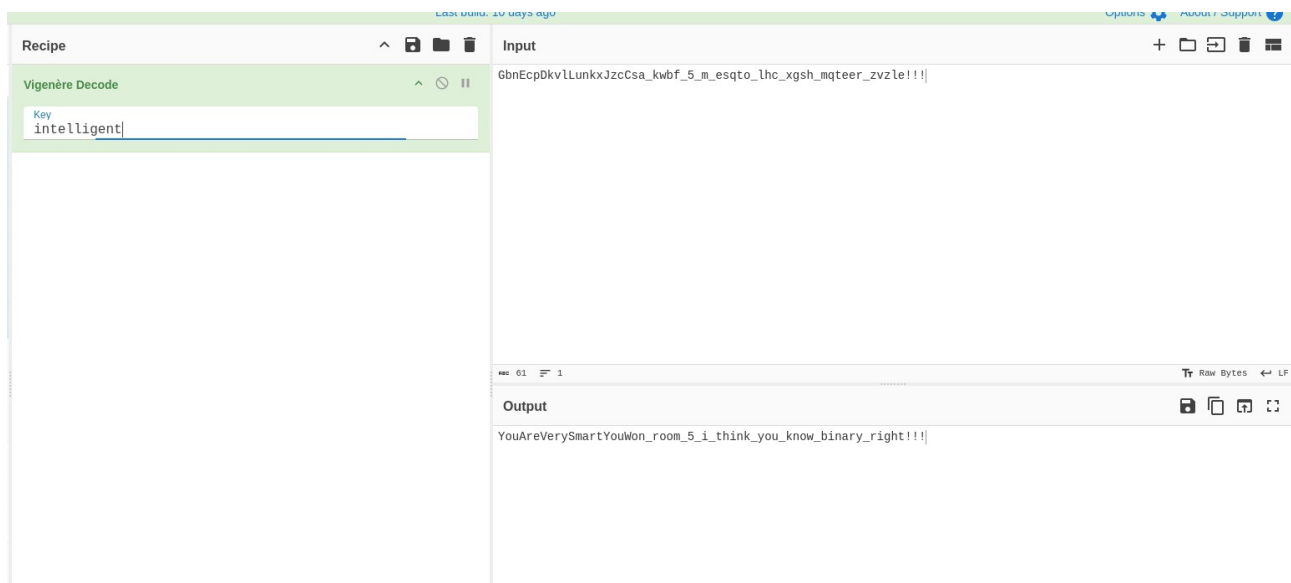

(jonathan@Anonymous)-[~/Desktop/gift/cards]
$ echo SSBkb250IGxvdmUgeW91 | base64 -d
I dont love you

(jonathan@Anonymous)-[~/Desktop/gift/cards]
$ cat joker
key : intelligent

(jonathan@Anonymous)-[~/Desktop/gift/cards]
$

```

- > when i open four of the ace card file I found the Vigenère Cipher message.
- > and a key from joker card and i use the key to decode the message.

- > After decoding the cipher text i get another message :

YouAreVerySmartYouWon_room_5_i_think_you_know_binary_right!!!

- > I think it is a hint for me when i navigate to the rooms folder 5 number is not present but then i notice that 101 is the binary number of 5 and I navigate to the 101 folder and I found the secret.txt which is protected.

- >From previous method i use the decrypted message to open this file and I got the Flag.
